FILE 00

You
already
use AI.

- > prompt("fix this segfault")
- > prompt("write the README")
- > 2,000 tokens/day. zero systems shipped.

But can
you build
it?

FIG. 01 — SYSTEM SKELETON · 3 OF 4 BLOCKS UNDEFINED

Knowing how to use AI is table stakes.
Knowing how to build AI systems is
the advantage.

You've built software.

Now build systems that can reason, retrieve, act
and execute.

EACH SYSTEM: REPO · DEPLOY · FLIP · ACCESS
DEMO POINT →

AI won't replace engineers. Engineers who build with
AI will move faster.

FIG. 02 — LADDER · INDICATIVE → THE BUILD

PRODUCTION SHEET // FOLD LOGIC — NOT FOR PRINT

A4 TRI-FOLD (ROLL) · FLAT 297×210MM · CLOSED 99×210MM · +3MM BLEED · 9MM SAFE

White outside. Dark inside.

STEP 01 · CLOSED

Plain white object, one sci-fi line, one arrow. Nothing says "course". The QR is on the reverse so a closed flyer still converts.

STEP 02 · FIRST OPEN

Cover swings open: half the view goes dark (the reveal), half stays white (the challenge). The contrast is the moment.

STEP 03 · FULL SPREAD

Flap unfolds: the full dark inside. FutureX revealed, the four-level path, six shipped systems, then "flip" back to the QR.

PRINT SPEC

SHEET 297 × 210 mm + 3 mm bleed
PANELS 100 / 99 / 98 mm (roll fold)
FOLDS 01 folds in first, cover last
STOCK 300 gsm uncoated, bright white
INK CMYK; cyan ref C70 M0 Y0 K0
FINISH soft-touch outside · spot UV arrow
SAFE 9 mm inside each panel
QR 46 mm, white quiet zone

Pages 1–2 are the two print sides; export at 100%.
